

## Whitepaper

# • EQUITY •

## Earn more than interest!

Our mission at Equity is to provide crypto users an option that works like a traditional savings account at a bank. Holders of Equity will receive reflections from the transaction tax in a user selectable coin such as BUSD or USDC or any other token. \*Reflections earned are not interest.

Buy and sell transaction taxes are variable and set by the user. By default 10% tax is used and allows the holder to receive reflections. Users have a choice of tax ranging from 5% to 25%.

All tax charged on transactions is pooled for reflections to the holders. Due to the variable nature of the tax reflections are divided as shown in the following chart.

TAX PAID	5%	10%	15%	20%	25%
REFLECTIONS	0x	1x	1.5x	2x	2.5x

A small amount of additional gas is charged on each transaction, this is used to send reflections to holders. This additional gas is variable but will never be more than 3 times normal gas per chain, I.E. gas less than \$1.50 on BSC allowing us to pay 8-10 holders reflections each transaction.

The team and marketing are paid in reflections alone, no tokens are held by the team. We do not need to hold tokens to receive reflections. The team truly do not get paid unless the holders get paid. There is no lock because there are no tokens to sell.

## Token Distribution

We have a circulating supply of **1,000,000 coins**.

- Polygon: 1,000,000 Equity
- Presale: 543,001
- Quickswap (LP): 325,800/Polygon + 102,746/USDC = 428546 Rebalance/  
burn\*: 17,593
- Dxsale fees: 10,860

## Team

Our development team consists of 4 members, we are all long time crypto enthusiasts and very active in the community. We have all been very active in the BSC space over the last year and are certified diamond hands. We have built several of the best crypto communities on Discord including several high profile projects. We will not name drop but if you are part of these communities you will know us.

- **Project Manager**

James Woodfin AKA Dookiejones on Discord, Twitter, Telegram and Steam.

- **Business Development Manager**

LaDy Ninja on Discord and Telegram, Crypto LaDy Ninja on Twitter.

- **Community Manager**

Diesela3 on Discord and Telegram.

- **Lead Engineer**

Deathwing on Discord and Deathwing1337 on Telegram.

## Road Map

- ✓ Stage one: Complete and test contract, website, dashboard.
- Stage two: Complete private sale, security audit of contract, marketing for presale.
- Stage three: Complete presale and launch token.
- Stage four: Continuous marketing. Implement community feedback as necessary.

## Security

**Security is our number one goal.** We have been a part of the BSC space for nearly as long as it has existed. We have all been rug pulled more times than we care to admit. As such, our focus is on the security of your funds.

Our LP and marketing wallets are all using Gnosis Safe Multisig verification so no one team member can access these funds. The LP wallet will be locked in 4 month intervals because we expect Pancake V3 soon and will migrate once available. We will be maintaining our LP locks quarterly for the life of the project.

Our team and marketing wallets will be locked by the contract for 1 year at minimum, those wallets will not be able to buy, sell or transfer Equity until the lock has expired.
